The Waycross Reporter is mad with us for calling it an organ. The editor says: "The Reporter takes its stand, on all matters of interest, upon principle and principle only." When the editor of the seporter demonstrates to us that there is any principle in the fight the railroads, or to speak more pisaily, the Savannah, Florida and Western railway—is making against the railroad commission, we will then be prepared the apologize. So far as we can see at present, the only question is one of dollars and cents. We published a communication in our last issue from a gentleman who is intimately connected with the railroad interest, in which he admits that the fight is being made against the commission because the commission based its rates on a small allowance for the value of the road and the running expenses, and a lower per cent of profit than the road thought just and right. That is simply a difference in regard to profits on an investment, and we fail to see any principle. When we are further enlightened maybe we will take a different view of the matter. At present a powerful microscope would fail to discover the principle.

It is understood that in view of the recent large influx of deluded women, Mormon converts so-called, from Europe, the state department is devoting attention to the condition of the law in regard to the immigration of men and women bound for Jutah, sent from Europe by Mormon agents. There are, of course, Eo accurate statistics showing the number of converts annually sent to America by Mormon missionaries in Europe, but it is known to be large, and it is known that women exceed men in numbers. It is notorious that the women are brought over for polygamous by purposes. They are generally kept in ig norance of the real nature of Mormonism, but the purposes had in view by the men who convert them and send them over here are well known to the government. It c n be said that if the government had the power this flow of immigrants would be checked, and diminished at once. Unfortunately there, is no provision of law directly applying to this class. In the absence of any such law, the department has done the best it could in instructing our representatives abroad to do all in their power to prevent the people of the countries to which they are accredited from embracing the Mormon faith, so called, and emigrating to America. It has now under consideration on a suggestion advanced by Mr. Nicholas Fish, our representative in Switzerland, from whence come so many emigrants of the class referred to, in a report upon criminals, paupers, insane and other undesirable persons sent to the United States. Mr. Fish says:

There is another class of emigran's that we should stop, and that is recruit for Mormon polygamists. One hundred and nineteen of these from Switzerland passed through Rotterdam alone in a single month of 1878, and were followed by 103 of the same nationality in May and June of 1879. TERMS OF SUBSCRIPTION:

THE CONSTITUTE.

Entered as second-class matter in the Atlant post-office, December 11, 1879. ATLANTA, GA., MAY 6, 1881, THE Turkish government is very will ing and proposes to be able to carry into effect the new Greek boundary. The sultan's ministers have in this case gained important concessions, by refusing to follow the advice of the Berlin

Among the remirations that were confirmed yesterday, that of William Walter Phelps, as minister of Austria, is the best known. The Chinese treaty chiefly absorbs the time devoted to executive sessions. Its exact terms have never been published, and very little is known about the views of senators in relation to it.

The new car and his advisers are coming to their senses. They have decided to give the people constitutional government. The first responsible ministry is to be presided over by General Melikoff, who will be known as the premier of Russia while he stays in office. A responsible ministry involves, of course, a parliamentary body to criticise, approve or condemn. The election of depatites has not been authorized, but it is not doubted that they will be. Russia will then take her place among the countries that check the excess of rulers by constitutional limitations. The abolition of banishment for political offenses and of many other obnoxious methods will then be quickly ushered in.

Rock, Pickens county, are in the city to solicit subscriptions in aid of the Mariet ta and North Georgia road. They want, in a word, Atlanta to give \$2,000, and they unhesitatingly say that the giving of this sum will secure the building of the road from the present terminus to Mur phy, in North Carolina. The case stands this way: representatives of Cincinnati and Boston capitalists have agreed to build and equip the road if each county above Cherokee will give towards the work a specified sum. Gilme and Fannin counties, and Murphy in North Carolina have secured their por tions of the proposed contribution, and Pickens is trying to get subscriptions for \$10,000-the sum that she is expected to give. About \$7,000 have been secured after a strong effort. If Atlanta will add \$2,000 to this amount, the committee will be able to raise the small remainder at until a train of cars is driven to the Gilmer county line. These are the facts. and THE CONSTITUTION is convinced that only a presentation of the facts is neede to induce the far-seeing business men Atlanta to take steps to secure the speedy completion of a line that will pour inte

All the world, young an old, visits galleries in which "undraped statutes" figure, and drawing from the east is practical work far preferable to idle sight-seeing in its effect. Genuine admiration for the nude is an acquired taste with all Saxons, and generally acquired with sove difficulty and a rather "creepy" feeling in the early stages of an art education. People are as good as born with their clothes on, and a critical appreciation of the nude does not, and cannot, exist outside of a narrow circle of artists; but the public has made up its mind to admire in art what it will neither tolerate nor mention in life, and there is nothing for it but to be simple, direct and unafficted about it.

The expense of the great cotton exposition at Atlanta will reach a high figure. To run the machinery will require not less than two miles of shafting! All sorts of novelties in the manufacturing line are to be shown. The enterprise will be a success in all respects, and every city in the south should take a hand in it, for their own benefit and for the encouragement of our king of industries. For cotton is now more truly "king" than ever "king" of exports, and soon to be "king" of southern manufactures.

Without any solicitation on my part, I take pleasure in stating that I have used your Medicated Feed on a very poor cow of mine that has been under the weather for some time, with the best results. She is now improving very fast in looks, flesh and milk, and the milk is much increased in quantity and better in quality; and I can say without any hesitation, that there is now in flesh and milk, than Shoenfeld's Medicated Feed.

Respectfully, Mrs. M. O'DONNELL.

I have such confidence in your Stock Feed that I will add my testimony to the many others you have. I gave some to my hogs which had refused to eat, and not knowing what disease they had, I hardly knew what to do to save them. It was a disease similar to cholera, but neither my neighbors nor myself had ever seen a disease exactly like it, but knew it was not the cholera, although it was as bad or worse. I got a package of the Stock Feed, and by holding the hogs, I got about three or four doses in them, and in less than two days, they commenced eating, and in a week, were perfectly well. This is what I know to be so.

Yours truly,

LT OF THEIR VISIT TO NEW YORK The Hypotheont-d Bonds are R.deemed, Detained by Attachments, which the Court Overcomes by an Order— A Report Looked For.

WORK

UNHAPPILY MATED.

They Seek to Unsay the Vows Spoker

Thomson, the assignees of the Citizens' bank, from New York, the public has been exceedingly anxious to acquire the result of their visit and with their usual industry the representatives of THE CONSTITUTION have been probing the matter, but not unt yesterday was anything like a satisfactory

result reached. It is generally known that the assigned went to New York in order to redeem cer-tain bonds, notes, etc , which were deposweather with occasional rain, will prevail to-da v and to-morrow in the lake region, Ohio valley an Tennessee; and that fair weather will prevail by the New England and middle Atlantic states dur ing to-day, followed by increasing cloudiness and local rains to-night and to-morrow. The Missouri known to be worth more than the debts desire to redeem them.

These securities consist of \$52,551 of re

discounted paper, \$17,124.45 of general collateral paper, \$43,000 of Atlanta 6 per cent bonds, and were given to secure a debt of \$37,760, and \$10,000 of Atlanta cotton factory first mortgage bonds given to secure a loan of \$20,000; also \$100,000 of Georgia iron works bonds. As will be readily seen all these securities are good, and desirable all these securities are good, and desirable property upon which there can be realized almost, if not quite, the face value.

When the receivers arrived in New York they ascertained that two attachments had been issued against these bonds, one in favor of the United States national bank for \$2,450, and the other in favor of the Mechanics bank of New York for \$1,125, thus preventing the return of the securities until these attachments are satisfied.

Since their return Messrs, Hill and Thomson have submitted a petition to the Fulton superior court in which they set forth the foregoing facts.

The same paper says that the receivers are advised and believe it to be true that the laws of Georgia have no such territorial force as will give the creditors of the Citizens' bank any lien prior to that acquired by the attachment which now holds the securities in New York. The petition also states that it will be largely to the interest of the creditors to have these assets within the jurisdiction of the court and under the control of the receivers, and adds that the American Exchange oank will not consent to their removal unless its present prior lien is retained, but that the bank is wilproperty upon which there can be realized

control of the receivers, and adds that the American Exchange oank will not consent to their removal unless its present prior lien is retained, but that the bank is willing to deposit these assets in the Atlantanational bank subject to the order of the receivers provided they—the American Exchange bank—are paid in full. The petition then closed by asking the court to grant an order directing the receivers to comply with the terms dictated by the American Exchange bank, and in response thereto Judge Hillyer Tuesday passed an order directing the receivers to enter into an agreement with the American Exchange national bank, in which it is agreed that if it would deposit all of said securities in the Atlanta national bank, that their lien should not be interfered with, and they should be protected against said attach ments. The receivers accordingly executed the agreement and forwarded it by the fast mail on Tuesday last, so that we may expect all of the New York assets here by the first of next week. When they arrive we see no reason why a report should not very soon thereafter be made to the court, and the public be afforded an opportunity to investigate the true inwardness of the failure.

The Exposition. Baltimore, May 5 -About two years ago the Western Maryland agricultural society, which holds its annual fairs at Cumber land, Md., contracted with Rev. Henry Ward Beecher to deliver the annual adiress at its October fair. The fact of the contract was widely published, but for contract was widely published, but for some cause Beecher was not present, and consequently failed to deliver the address There was great disappointment among the throng of visitors at the fair, and the society was accused of having made its announcement without authority as a card to draw. A day or two since it was relegraphed from Washington with the general news that Mr. Beecher was in that city, and his presence there became known to the officers of the society at Cumberland. Beecher left Washington this morning for New York, and when the train in its passage through Baltimore stopped at the union depot, a deputy sheriff stepped aboard and served summons on Beecher to answer suit against him by the agricultural Mary E Johnson vs James M Johnson.

The Exposition.

Learning of the arrival in the city of Mr. C. T. Sabin, recently appointed the chief of the department of machinery and engineering, of the International cotton exposition, our representative sought an interview with him at the office of Mr. H. I. Kimball, director general, yesterday evening. We found him a gentleman evidently prepared for heavy work, being of medium height, and weighing some two hundred and fifty pounds and as solid in his whole appearance as if he might bear the burden of the whole enterprise.

About forty years of age, of grave but pleasant aspect, he appears like a man for business and no nonsense.

To our inquiries he responded with readiness and courtey and with an evidently thorough understanding of his subject and premises. In the short time that he has been interested in the exposition, his plans have been thought out and well considered and he is of the opinion that there will be no difficulty in carrying them to prompt completion. He reported that while he found the machinery men of the north full of business and diven to fill their orders, they have all evinced a very decided interest in the cotton exposition, and propose to make large and handsome exhibits, and he anticipates no serious trouble in securing the necessary power and man delighted with the location and grounds, and says that he fluds there everything required to make the site and surroundings of the exposition all that could be desired. Rome Courier.

We had the pleasure of meeting on yesterday Mr. W. L. Peel, of the firm of Maddox, Rucker & Co., bankers and cotton factors, of Atlanta, Ga. Mr. Peel came up to Rome and bought at sheriff's sale the fine Herring safe which had belonged to the bank of Rome. There is not a finer safe in the state of Georgia than this one. It is Herring's best make, being both fire and burglar proof, and is supplied with the latest patent Yale time lock; the safe and lock costing originally about \$2 000. It brought at the sale yesterday only \$960, and as soon as the money was paid over it was removed to the depot for shipment to Atlanta. The failure of the bank of Rome did not result from the lack of a safe place to keep its money, but from the lack of money to put in a safe place. The firm that now owns this excellent safe may feel secure, and those dealing with them may feel likewise. Maddox, Rucker & Co
